

Aditi Agarwal

Product & UI/UX Designer

New Delhi, India · +91 98183 77310 · Gmail · LinkedIn · Dribbble · Behance

Product & UI/UX Designer with 2+ years of experience taking B2B and healthtech products from research through shipped, high-fidelity UI. Built a design system and platform UI from the ground up at a cybersecurity startup, and independently expanded a physiotherapy app into a full two-sided product. Comfortable working directly with founders, PMs, and engineers to turn ambiguous problems into usable interfaces.

EXPERIENCE

FourCore

Breach & Attack Simulation Platform, New Delhi

UI/UX Design Intern → UI/UX Designer → Senior UI/UX Designer

Feb 2024 – Present

- Redesigned the FourCore website end-to-end (10+ screens, mobile & desktop) in a 2-month sprint, then led the ground-up redesign of the core adversary-emulation platform's UI.
- Built the product's first design system – components, spacing, and interaction patterns – bringing visual consistency across the platform and speeding up how fast new screens ship.
- Restructured how attack simulation data is presented, turning dense security output into views users can read and act on quickly.
- Promoted to Senior UI/UX Designer (Aug 2025); now lead a junior designer, work directly with the product manager and engineering team, and turn client and user research into shipped features.

SELECTED WORK

Formi

Independent Product Design · Ongoing

Physiotherapy platform · evolved from Proctify, a college project

Originally "Proctify" – a physiotherapy app for patients only, built with a 4-person team in college (Top 15, Smart India Hackathon; Top 50 Global, Google Solution Challenge). Independently reworked it into Formi, a full two-sided product neither Proctify nor its original team had scoped.

- Introduced a therapist-facing web dashboard the original concept never accounted for, alongside the existing patient app.
- Rebuilt the product from the ground up – workflow, information architecture, and a programme-delivery model connecting therapist and patient – not just the interface.
- Authored the complete PRD and design system: a 23-screen breakdown spanning both the therapist and patient experiences.

Conqr.ai

Solo Freelance · ~2 months

Legal AI assistant platform

Designed the single-scroll marketing landing page from scratch and redesigned the existing product (10–12 screens) solo, shaping a brief for an approachable, trustworthy legal AI experience into a calm, credible interface.

Autumn

Independent Project

E-book reader, mobile app

A subscription e-book reader designed to feel as immersive as reading a physical book, with bookmarking, notes, and a signature feature: personalized, colour-coded tabs that slide out into a sticky-note-style panel without leaving the page.

SKILLS

Design: Product Design, UI/UX Design, Design Systems, User Research, Wireframing, Prototyping, Interaction Design, Typography

Tools: Figma, Sketch, Canva, Git, GitHub, GitLab

Frontend: HTML, CSS, Tailwind CSS, Bootstrap, React (basic)

EDUCATION

B.Tech, Computer Science

Dec 2020 – Aug 2024

Maharaja Agrasen Institute of Technology · 8.91 / 10 CGPA

CERTIFICATIONS

UX Design – Accenture

Product Design & Development – NPTEL, 85%

Functional & Conceptual Design – NPTEL, 84%

UX Design Workshop – InnovateU

AWARDS

Top 50, Global – Google Solution Challenge 2022

Top 15 Teams – Smart India Hackathon 2022

Rank 4 / 150 – LiveTheCode Hackathon

Runner-Up – Evotech 5.0 Ideathon, BVPCOE

Top 50 / 115 – DotSlash 5.0

MENTORSHIP

UI Development Mentor – Girl Code It: ran a Git & GitHub fundamentals session for 300+ students, mentored 5+ mentees through a UI development bootcamp.
